## Take collaboration to new height

Imagine a new way to bring people and ideas together.

Walk into a meeting room and in seconds your team is brainstorming on a digital display. Write, save and distribute meeting notes.

SMART solutions help create an environment where teams can share ideas, communicate with colleagues and save time.

How are we redefining the way people work? SMART solutions let you collaborate with remote team members in real time as if they were sitting right next to you - whether they're in different offices, different cities or different countries.

It's as easy as a simple touch, fingertip to screen.

**Government / Military**

Enhance group communication and expedite training with SMART solutions.

**Business**

Drive speed, clarity and collaboration with SMART products.

**Education**

Transform your classroom with SMART education solutions and free teaching resources.

### Collaboration solutions

With SMART solutions, conferencing becomes a visual, interactive experience, and keeping records of meetings is effortless. Teamwork is a collaborative, inclusive process that produces valuable ideas, whether your colleagues are in the same meeting room or on different continents. At SMART, collaboration isn't about technology. It's about people, ideas and the ability to bring them together in a meaningful way - and most of all, we make it easy.

### Training solutions

SMART solutions help you get the most from your training investment. SMART can help you deliver efficient, interactive programs whether your learners are on different continents or in the same room. When you teach and work collectively using SMART solutions, training sessions are easy to present and hard to forget. After all, SMART is synonymous with education. Over 18 million students are learning with SMART around the world. Research proves students learn better in active, collaborative environments.

# It's time to say goodbye to your dry erase board

SMART collaboration solutions:  
the applications you know  
and the clarity you need.

## SMART Board interactive displays

The SMART Board™ interactive displays are a touch-enabled LCD display designed to give you access to digital materials in your meetings and make interacting with your notes a more intuitive and engaging experience.

DViT (Digital Vision Touch) technology.  
Display resolution: Full-HD (1920 x 1080).  
SMART Product Drivers and SMART software.  
Warranty 2-years.

- SMART Board™ 8070i, 70" Interactive Display, color black

## SMART Board 400 series interactive display overlay

Bring touch capability to your flat-panel display by adding the SMART Board® interactive display overlay. The overlay adds interactivity to existing flat-panel displays, enabling you to open files, applications, websites or multimedia on your display and write notes in digital ink, save them to your files and share them via e-mail.

- Display Frame 42", 46", 47"
- Display Frame 50", 52", 55", 56", 57", 58"
- Display Frame 60", 61", 65"

## SMART Podium™ interactive pen displays

Create engaging presentations and dynamic collaboration sessions with the SMART Podium™ 500 series interactive pen display. You can interact with digital content and write over it on SMART Podium, all while displaying that content on a large screen in the same room or from a remote location.
